Taran Moses

La Crosse, VA • taranmoses21@gmail.com • (434) 865-2660

Education

Old Dominion University — Norfolk, VA
B.S in Computer Science — December 2025
M.S in Data Science and Analytics — TBA
OSHA 30-Hour Construction Safety and Health Certification — December 2024

Relevant Coursework:
Intro to Machine Learning – Practiced several machine learning algorithms in multiple scenarios and implemented techniques to achieve maximum accuracy
Intro to Artificial Intelligence – Studied many agent designs and algorithmic choices as they relate to various environments and their nuances.
Intro to Software Engineering – Participated in studying and implementing several professional software development cycle practices
Workforce Development – Furthered knowledge is replicating software development cycles by working with a team for a year to brainstorm, research, and develop a software product with the intention of solving a real world problem

Park View High School — South Hill, VA
Acquired CompTIA A+ certification during dual enrollment with Southside Community College — June 2021

Experience

Old Dominion University — Norfolk, VA

Full stack Developer — Jan. 2025 – Dec. 2025

- Worked closely with a team of eight to formulize and develop a software product prototype meant to solve a real world problem.
- Project consisted of creating a mobile application meant for solving the current loneliness epidemic.
- Website link: https://bdutt001.github.io/f25-Iron/index.html
- GitHub link: https://github.com/bdutt001/f25-Iron

Game Behavior Clustering Study – CS522 — Sept. 2025 – Dec. 2025

- Designed and developed a program that took a survey done by gamers, and created clusters to classify groups of gamers based their life satisfaction levels.

Leadership & Activities

Old Dominion University — Norfolk, VA

Team Lead – CS350 Enrollment Projection System — Sept. 2024 – Dec. 2024

- Led a 4-person team to design and implement a Java-based reporting system; delegated module tasks and coordinated documentation on GitHub.

Skills & Interests

Technologies: Python and its Machine Learning libraries**,** Java**,** React Native**,** Node.js, C++, Microsoft Word, Microsoft Excel
Skills: Strategic Planning, Web Development, Critical Thinking, Attention to Detail, Team Player
Interests: Full-stack development, Data-driven development, AI-driven social systems, Data Analysis, Data Engineering, Machine Learning, Artificial Intelligence
